ON-SITE ESTABLISHMENT REVIEW OF 3TU

*DP 21*

Director of Communications - Electronics, Air Force

Reference: A. Your AF111/24/820(45) of 9 October 1980

*4/5 ADC*  
*↑ info.*

As requested on Reference A, tasking of 3TU has been examined and the following reflects our current requirements for the station:

Collections

|               |                            |                       |
|---------------|----------------------------|-----------------------|
| Morse         | 2 Positions x 24 hours/day | 48 Operator hours/day |
|               | 1 Position x 15            | 15                    |
| Morse/Voice   | 4 x 15                     | 60                    |
| Printer/Voice | 2 LE x 24                  | 24                    |
|               | 8 x 15                     | 60                    |
| Morse S/D     | ✓ 1 Position x 24          | 24                    |
| Non Morse S/D | ✓ 1 x 24                   | 24                    |
| Hf Df         | ✓ 1 x 24                   | 24                    |
| CSP           | ✓ 1 x 24                   | 24                    |
|               |                            | <u>303</u>            |

Processing

A processing section is required to be manned 8 hours/day, 5 days/week, to support station tasks.

Hf Df

The Df1 Hf Df and the Control Screener Position are required to be operated for 24 hours per day, 7 days per week,

2. I trust the above meets your requirements for the proposed establishment review of 3TU but should you require further detail or amplification of that provided, please do not hesitate to contact us.
